

SURVEYS

Board Policy

All surveys concerning school programs or activities conducted by any organization group within or outside the school where they use school supplies or facilities and students take them home, must have prior approval by the school district superintendent before the survey is conducted.

Survey questions must be directly related to the subject of the survey. Any information received which does not directly relate to the survey should be kept separate and submitted to the school district office if the information would assist in improving the educational programs of the school district.
